[GSS22]

THURSDAY 17 MAY 2018, MORNING

TIME

1 hour 15 minutes, plus your additional time allowance.

INSTRUCTIONS TO CANDIDATES

Write your Centre Number and Candidate Number in the spaces provided at the top of this page.

You must answer the questions in the spaces provided.

Do not write outside the boxed area on each page or on blank pages.

Complete in black ink only. **Do not write with a gel pen.**

Answer **all twelve** questions.

INFORMATION FOR CANDIDATES

The total mark for this paper is 75.

Quality of written communication will be assessed in Questions **3** and **11**.

Figures in brackets printed down the right-hand side of pages indicate the marks awarded to each question or part question.

A Data Leaflet, which includes a Periodic Table of the Elements, is included in this question paper.

- 1 (a) The diagrams below show the nuclei (protons and neutrons) of four atoms **A**, **B**, **C** and **D**.

A

B

C

D

Key: ○ Proton
● Neutron

Source: Principal Examiner

- (i) Which atom (**A**, **B**, **C** or **D**) has an atomic number of four?

_____ [1]

- (ii) Name the element represented by **C**.

Use your Data Leaflet.

_____ [1]

- (iii) Which **two** nuclei are from the same element?
Choose from **A**, **B**, **C** and **D**.

_____ and _____ [1]

(b) (i) How many electrons will an atom of element **B** have?

_____ [1]

(ii) On the diagram below, show how the electrons in element **B** are arranged.

[1]

(iii) What is the Group number and Period number of element **B**?

Group _____ Period _____ [2]

[Turn over

- 2 (a) Elements and compounds can be represented by chemical symbols and formulae, but they must be written correctly.

Use your Data Leaflet.

- (i) What is the correct formula for sodium chloride?

Circle the correct answer.

Na_2Cl_2 : Na_2Cl : NaCl_2 : NaCl [1]

- (ii) What is the correct formula for magnesium chloride?

Circle the correct answer.

mgcl_2 : MgCl_2 : MGCL_2 : mGcl_2 [1]

- (b) A compound has the formula CaSO_4 .

- (i) How many elements are present in CaSO_4 ?

_____ [1]

- (ii) How many atoms are represented by the formula CaSO_4 ?

_____ [1]

- (iii) Name the compound with the formula CaSO_4 .

_____ [1]

4 The table below gives the colour of five indicators at different pH values.

Indicator \ pH	1	2	3	4	5	6	7	8	9	10	11	12	13	14
cresol red	R	O	Y	Y	Y	Y	Y	V	V	V	V	V	V	V
universal	R	R	O	O	Y	Y	G	B	B	I	I	I	V	V
thymol blue	Y	Y	Y	Y	Y	Y	Y	Y	B	B	B	B	B	B
phenolphthalein	C	C	C	C	C	C	C	P	P	P	P	P	P	P
blue litmus	R	R	R	R	R	R	B	B	B	B	B	B	B	B

Key:

R = red; O = orange; Y = yellow; C = colourless; P = pink;
G = green; B = blue; I = indigo; V = violet

(a) Use the information from the table above to answer the following questions.

(i) What colour is thymol blue indicator in a neutral solution?

_____ [1]

(ii) Name the indicator which gives the largest range of colour.

_____ [1]

(iii) Name the indicator which **cannot** distinguish between pH 1 and pH 8.

_____ [1]

(b) Suggest **two** reasons why phenolphthalein indicator is of limited use when testing solutions with different pH values.

[2]

(c) Complete the word equation below for the reaction of an acid with an alkali.

[2]

[Turn over

7 The table below shows information about some metals.

Metal	Density/ g/cm ³	Relative strength	Relative electrical conductivity	Cost per tonne/ £
copper	8.9	0.6	5.7	3100
aluminium	2.7	0.3	3.8	950
silver	10.5	0.4	6.1	250 000
iron	7.9	1.0	1.0	130

Aluminium is used in overhead cables in the National Grid. This carries electricity throughout the country.

QUESTION

- (a) Silver is the best conductor of electricity shown in the table.
Explain fully why overhead cables in the National Grid are **not** made of silver.

[3]

- (b) Look at the properties of copper in the table opposite. Suggest **one** use for copper in the home.
Explain why copper is the most suitable metal for this use.

[2]

[Turn over

- 8 (a) In September 2017 an earthquake struck southern Mexico, 123 km from Mexico City. It killed 230 people across the region, and rescue crews continued for days to search for survivors. At least 21 children and four adults died in the collapse of a private school. A lot of buildings completely collapsed in Mexico City, with thousands more left damaged and unstable.

The table below shows how the Richter scale is used to compare the size of earthquakes.

Richter magnitude	Earthquake effects
0.0 – 1.9	not felt by people
2.0 – 2.9	slight movement felt by people
3.0 – 3.9	ceiling lights swing
4.0 – 4.9	walls crack
5.0 – 5.9	furniture moves
6.0 – 6.9	some buildings may collapse
7.0 – 7.9	many buildings collapse
Above 8.0	total destruction of buildings, bridges and roads

- (i) Suggest a Richter scale value for the earthquake in Mexico.

_____ [1]

- (ii) Explain why Mexico is more likely to experience earthquakes than Northern Ireland.

_____ [1]

(iii) Why might governments ignore scientists' predictions that an earthquake is about to happen?

[1]

(b) In the twentieth century scientists had different ideas about the causes of earthquakes. In 1915 Alfred Wegener proposed the theory of continental drift.

(i) Describe Wegener's theory of continental drift.

[2]

(ii) Give **one** piece of evidence that supports Wegener's theory.

[1]

9 Look at the table below. It shows the reactions of some metals. The observations were made during a science lesson.

Metal	Reaction when heated in air	Reaction with cold water	Reaction with steam
Potassium	violent reaction, burns with a lilac flame	floats on the water surface, burning with a lilac flame	extremely violent reaction, burns with a lilac flame
Zinc	burns slowly to form a white powder	no reaction	burns slowly giving off a gas
Copper	reacts very slowly	no reaction	no reaction
Magnesium	burns with a bright white light	very slow reaction	extremely violent reaction, glows white
X	reacts slowly	no reaction	reacts very slowly

(a) Use this information to put the metals, including X, in order of reactivity. One has been done for you.

[2]

(b) Suggest the name of a metal that could be metal 'X' .

_____ [1]

(c) Explain why potassium must be stored in oil.

_____ [1]

(d) When these metals react with air they undergo an oxidation reaction.
What is **oxidation**?

_____ [1]

[Turn over

10 (a) Hydrocarbons can be used as fuels because they burn in air.

(i) Complete the balanced symbol equation for the combustion of propane (C_3H_8).

(ii) Draw the structural formula for propane in the box below.

[1]

(iii) Butane is another hydrocarbon fuel. Give the chemical formula for butane.

_____ [1]

12 Aluminium is extracted from aluminium oxide using electrolysis, as shown below.

(a) Describe what is meant by **electrolysis**.

[2]

(b) Name a suitable material for the anode and explain why it is used.

[2]

(c) Aluminium is produced at the cathode.

Complete the ionic equation for this reaction.

THIS IS THE END OF THE QUESTION PAPER
