INSTRUCTIONS TO CANDIDATES

Write your Centre Number and Candidate Number in the spaces provided at the top of this page.

Write your answers in the spaces provided in this question paper.

Answer **all nine** questions.

Any working should be clearly shown in the spaces provided since marks may be awarded for partially correct solutions.

You **may** use a calculator for this paper.

INFORMATION FOR CANDIDATES

The total mark for this paper is 80.

Figures in brackets printed down the right-hand side of pages indicate the marks awarded to each question or part question.

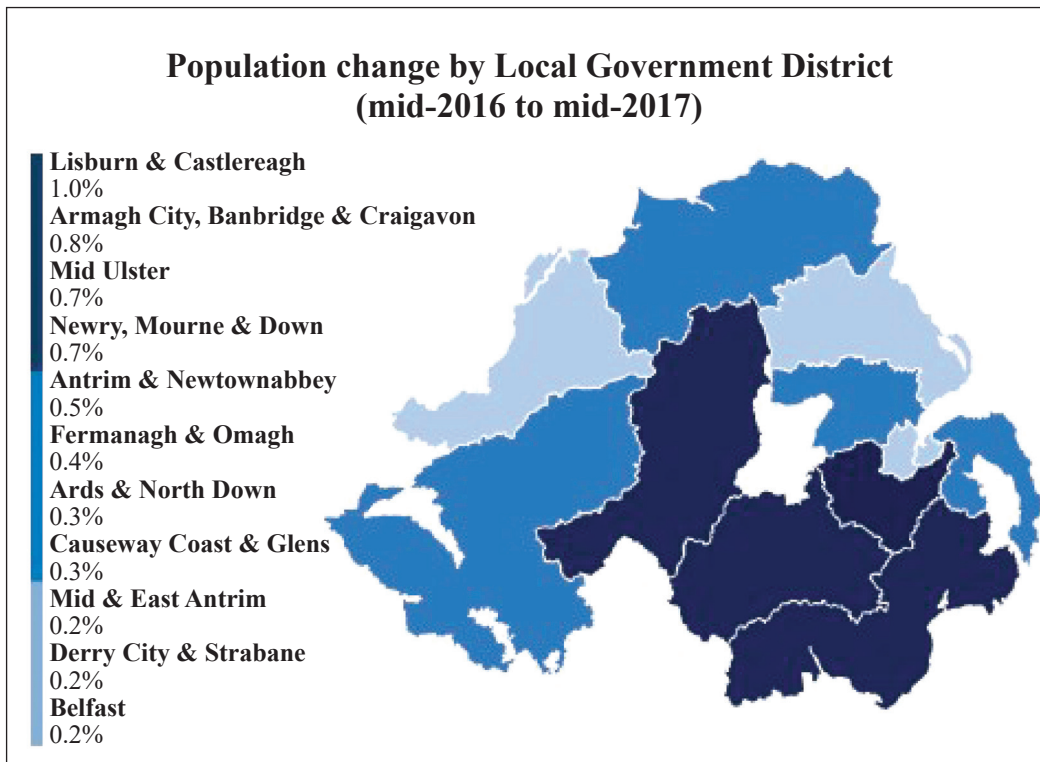

You should have a calculator, ruler, compasses and protractor.

There is no formula sheet for this examination.

(a) What percentage of the population are males aged between 20 and 29?

Answer _____% [1]

(b) In which age group is the percentage the same for both genders?

Answer _____ [1]

Jonathan says, “The population pyramid shows there are more females than males living in the town.”

(c) (i) Is Jonathan correct?

Yes No Cannot say [1]

(ii) Explain your answer.

[2]

3 A box contains six cards with letters written on them.

The cards spell out a word.

In a game, players try to guess the word by picking out a card, noting the letter and placing the card back in the box.

After 18 goes, Sean has noted the following letters.

(a) Use this table to summarise Sean’s results.

Letter	Frequency	Fraction of cards
A		
B		
N		

[3]

Sean says, “The cards in the box spell the word BANANA.”

(b) Do you think Sean is correct?

Give a reason for your answer.

4 The manager of a shoe shop wishes to make better decisions about the types of shoe she orders for her shop.

She records the shoe sizes of a sample of 20 boys and 20 girls who visit her shop.

The results are given below.

(boy, 3) (boy, 4) (girl, 3) (girl, 4) (boy, 2) (boy, 4) (girl, 3) (girl, 4)
 (girl, 3) (boy, 4) (girl, 4) (boy, 3) (girl, 4) (boy, 3) (boy, 5) (boy, 4)
 (girl, 4) (boy, 4) (girl, 3) (boy, 4) (boy, 5) (boy, 4) (girl, 4) (boy, 2)
 (boy, 5) (girl, 3) (boy, 2) (girl, 3) (girl, 2) (boy, 5) (boy, 4) (girl, 3)
 (girl, 4) (girl, 3) (girl, 5) (boy, 3) (boy, 3) (girl, 3) (girl, 3) (girl, 2)

(a) Tick one box in each row to identify the type of variable.

	Categorical	Continuous	Discrete
Shoe size			
Gender			

[2]

(b) Has the manager collected primary data or secondary data?

Primary data Secondary data [1]

(c) Complete the Tally and Frequency columns in the table below.

Shoe size	Boys		Girls	
	Tally	Frequency	Tally	Frequency
2				
3				
4				
5				

[4]

(d) On the grid below, draw a dual bar chart to represent the data collected by the manager.

30	No	No

7 Alex is the manager of a doctors' surgery.

He is concerned about the number of missed appointments.

Alex recorded the number of missed appointments each month for 20 months.

The results are given below.

31	4	19	0	5
25	10	2	16	24
17	22	173	21	13
20	18	3	11	26

One of the results is an outlier.

(a) Which one of the results is this?

Answer _____ [1]

The outlier is removed.

(b) With the outlier removed, draw a stem and leaf diagram to illustrate the data.

[3]

Examiner Only

Marks Remark

After some time, Alex extended his investigation by conducting a survey about the app with patients who came to the surgery.

One of the questions in the questionnaire was:

<i>How many times have you used our new app?</i>			
1–2	<input type="checkbox"/>	3–4	<input type="checkbox"/>
4–5	<input type="checkbox"/>	More than 5	<input type="checkbox"/>

(e) Write down two problems with the response section.

1. _____
_____ [1]

2. _____
_____ [1]

(f) Suggest one improvement Alex could make to his investigation.

_____ [1]
