

WORKSHEET: HORTICULTURE

ENVIRONMENT

Environmental impact in a Horticulture setting

From the photographs below draw a circle around one of the following products which can be recycled on a compost heap. Alternatively the learner can point to the appropriate answer. Recycling is one of the three '3Rs'

I confirm that this learner has / has not recognised a material which can be recycled on a compost heap to achieve EL1.

Teacher/Tutor Signature _____ Date _____

To achieve EL2 identify which of the following make up the “3Rs”.

Reduce

Reply

Rethink

Reuse

Replay

Remove

Recycle

In addition to the assessment required for EL1 and 2 complete the following task to achieve EL3.

Recycling conserves resources used in horticulture such as peat.

When we recycle, used materials are converted into new products, reducing the need to consume natural resources. If used materials are not recycled, new products are made by extracting fresh, raw material from the Earth, through mining and forestry.

List the names of three materials used in Horticulture which can be recycled.

1. _____

2. _____

3. _____

Why is it recycling important?

Student has achieved

EL1	EL2	EL3	Teacher/Tutor Signature
