

FICTION

# 'Inventions – the Wheel' Story

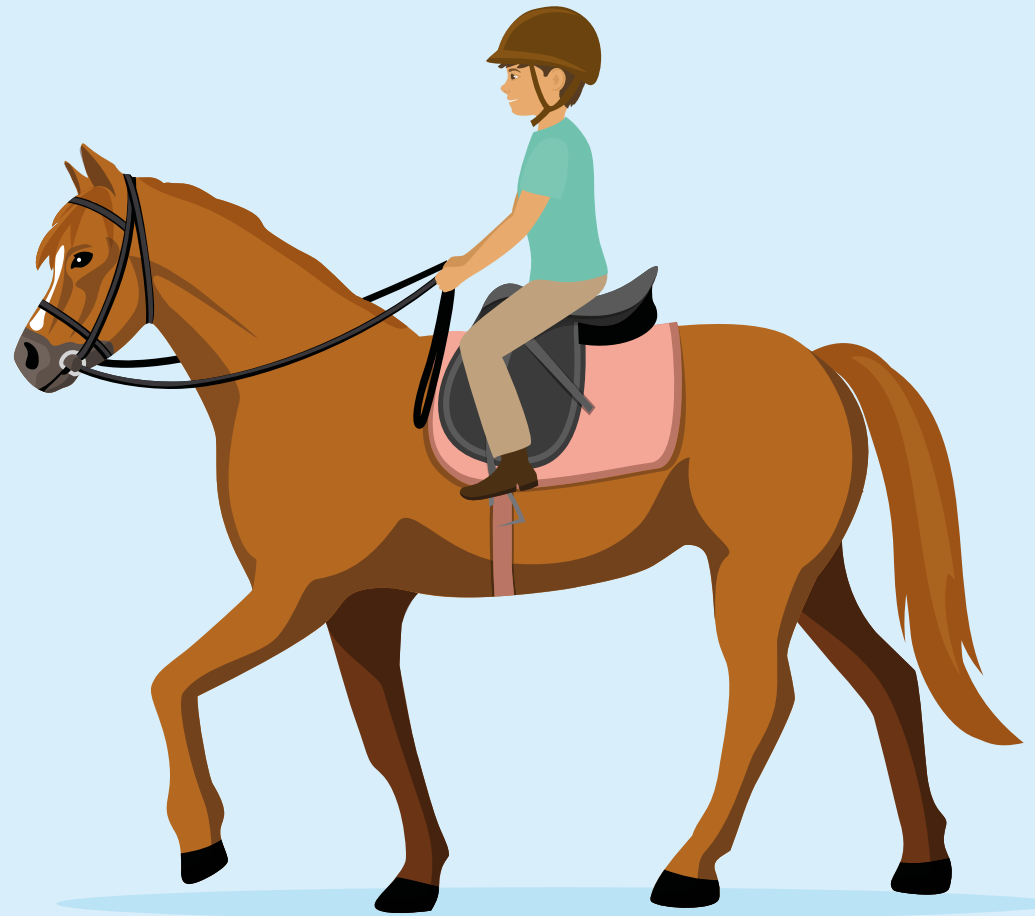

*Rewarding Learning*

Imagine having to carry all our shopping around the supermarket.

Imagine having to ride a horse or walk everywhere we wanted to go.

Imagine having to move lots of soil from one place to another by carrying it in your hands.

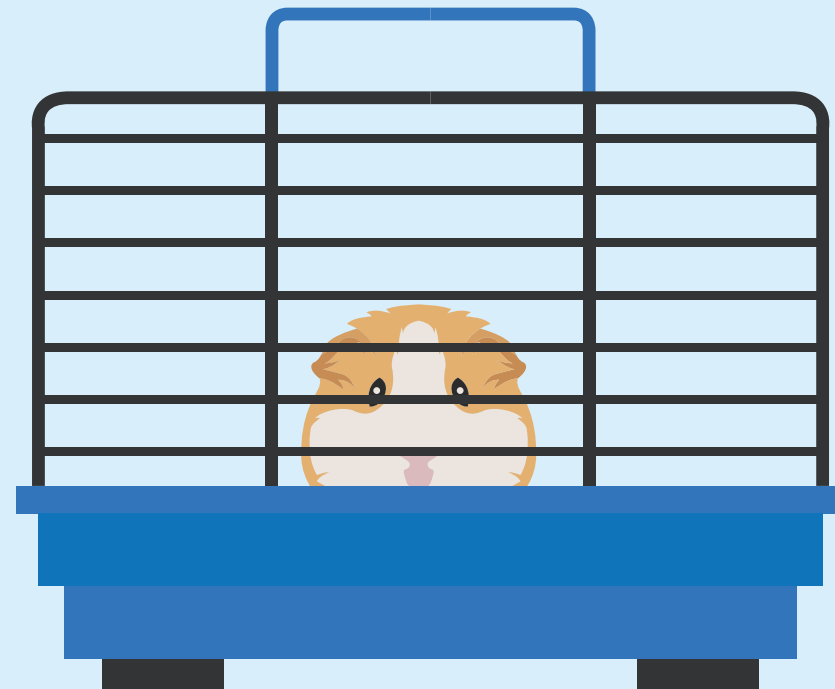

Imagine carrying a baby everywhere.

Imagine being stuck in the same place all the time.

Imagine if your pet was stuck in its cage and didn't have anything to do.

Wheels make our lives easier, they help us to move and lift things. Can you think of some machines that might help us with these jobs?
